COLLECTION

ÉBANO

CONCEPT

To engage people in a natural atmosphere, representative to the nature and the art.

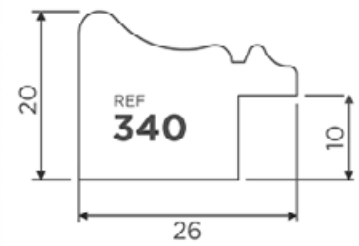

The **Ebano Collection** combines the neoclassic style with the modern trend of the wood and the curvy lines in the design to bring more warmth and cosiness to the environments, proving them with an affective and classic tone.

The Collection is inspired
in the **Ebano wood** and all it
represents in the history of
Picture framing and art, as raw
material for the Dutch Baroque
mouldings as a natural resource
of the components of the most
celebrated musical instruments in
the world.

The Collection receives an **internal
groove in gold**, bronze and lead
colors, a thoroughly studied detail
to bring a point of light to the
moulding, projecting the attention
of the eyes to the artwork.
